Office Action Summary	Application No. 10/070,222	Applicant(s) GAIT ET AL.	
	Examiner Maury Audet	Art Unit 1654	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Applicant's response of 01/31/2006 is acknowledged. The arguments of record have successfully traversed the outstanding rejections made in the Final Office Action of 11/02/2005. The original restriction requirement of 12/14/2004 is incorporated by reference in its entirety as well as the election of 02/14/2005, wherein Group VII (compounds of formula VI, present claims 62-64, 84-86 and 88-92) was elected as the invention. It is noted that the original/updated search of the elected subject matter, and formula VI of claim 62, was undertaken in the broadest reasonable interpretation of the claims. However, following another review of the claims in light of the invention described in the specification (and the prior art of record and arguments thereto), it has become apparent that the formula VI as claimed (searched/examined) and the actual invention is arguably indefinite and was thus misconstrued (e.g. M1-NH-, wherein the NH is actually part of the molecule or peptide residue bearing an amino group, not a separate NH as depicted (see specification page 17), CH-B-OM2 (wherein O is actually part of oligonucleotide compound, not separate therefrom), etc.). This has only now become apparent. It is suggested that Applicant amend the formula VI of claim 62 to more accurately convey the invention, and elect species as to ALL 'undefined groups' thereto (e.g. M1, A, D, B, M2), so that the invention/claims may be reasonably/accurately searched and examined. The Examiner realizes the present restriction/election requirement is being sent following examination on the merits; however, such is permissible when appropriate under the MPEP/Rules.

Supplemental Restriction/Election as to Species of Formula VI

This application contains claims directed to the following patentably distinct species of the claimed invention:

1. M1-a specific peptide residue (or molecule bearing an amino group if so claimed hereafter);
2. A-a specific alkylene or arylene group;
3. D-a specific C1-4 alkylene group or a C3-12 arylene group;
4. B-a specific linker or X-J (specific compounds thereto, as claimed); and
5. M2-a specific oligonucleotide.

Finally, Applicant is asked to draw out the complete compound with all elected species, so that no confusion as to the elected compound remains. The species are independent or distinct because a search of any one of the species is/may not be coextensive with another, and art on the former may not read on/render obvious the latter.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (as drawn to the Formula(s) of the elected group) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, non-withdrawn claim 62 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1654

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

In re Ochiai/Brouwer Rejoinder

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of

Art Unit: 1654

MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
